Russian cosmonaut Alexander is adrift in orbit around Earth while on a secret mission in the early days of the space race. He has lost communications with his ground-support station and his life-support systems are dwindling fast. He manages to make contact with an Italian radio engineer working the night shift. The two men bond as the engineer works diligently to save the life of a man he's never met. Flashbacks show viewers Alexander's history, one ripe with romance with a fellow female cosmonaut and a complex and uncontrollable set of circumstances that led to Alexander's plight.
